## CONTROL OVER AND PREVENTION OF INFECTIOUS DISEASE.

### GENERAL.

Infectious disease presented no problem during the year under review.

### IMMUNISATION.

Facilities for immunisation against diphtheria continue to be provided free of charge under the National Health Service Act. 116 children under the age of five years received their primary immunisation whilst a further 88 children of school age received injections to maintain their immunity.

### TUBERCULOSIS.

There was one death from pulmonary tuberculosis during the year. A further person was deleted from the register as having left the district and three as having been cured.

Seven new cases of pulmonary tuberculosis were notified. One additional case came to reside in the District.

Cases remaining on the register at the close of the year were as follows :-

	<u>MALE</u>	<u>FEMALE</u>	<u>TOTAL</u>
Pulmonary	27	15	42
Non-pulmonary	5	5	10
Totals	<u>32</u>	<u>20</u>	<u>52</u>

B.C.G. vaccination was offered to children of school leaving age for the first time in 1955. 21 boys and 21 girls accepted it.

### NOTIFICATION OF INFECTIOUS DISEASE.

The following cases were notified :-

Measles	17
Scarlet fever	8
Dysentery	1

NATIONAL ASSISTANCE ACT, 1948 and  
NATIONAL ASSISTANCE (AMENDMENT) ACT, 1951.

No action was taken under these Acts during the year.

## SANITARY CIRCUMSTANCES OF THE AREA.

For the preparation and presentation of the following data, I am greatly indebted to Mr. B. G. Elliott, M.R.San.I., Senior Sanitary Inspector, whose work during the year under review is herein summarized.

### Water.

The public piped water supply of the district has been satisfactory both in quality and quantity throughout the year. The results of samples submitted to the Public Health Laboratory for bacteriological analysis were as follows :-

Raw Water		Treated Water going into Supply	
Satisfactory	Unsatisfactory	Satisfactory	Unsatisfactory
NIL	NIL	5	NIL

The new central filtration and treatment works are completed, three new wells have been bored and tests of purity are being carried out. It is expected that the new supply will go into service in early 1956.

The present supply to dwelling-houses in the district is as follows :-

	<u>Houses</u>	<u>Population</u>
Number supplied from wells	14	42
Number supplied from public water mains:		
(a) Direct to the houses	3,347	10,000
(b) By means of standpipes	155	398

Samples were taken from three private wells and on bacteriological examination were found to be satisfactory. One private well was abolished and a piped supply substituted.

### Drainage and Sewerage.

Experimental chemical treatment of sewage has been carried on during the year. It has been partly successful but the whole question of the most suitable disposal process will have to be considered in the coming year.

### Closet Accommodation.

The total number of water closets connected to the sewerage system is now 5,090. The properties outside the sewered areas consist of five with private drainage systems and fourteen provided with pails or chemical closets.

### Public Cleansing.

There are no ashpits in the district, houses and other premises being provided with dustbins for the storage of domestic refuse. The removal of refuse is undertaken weekly as far as possible, and a large capacity S.D. freighter motor vehicle (fore and aft tipper type) is used for the purpose. The weekly collection of trade refuse from shops and other business premises is also undertaken upon application and at charges in accordance with the Council's Scale. At present 114 premises are included in this arrangement.
